Solar Mounting Solutions

Rayport™ Stainless Series Roof Ballast Rack

The ONLY stainless steel roof ballast system on the market, the Rayport™ Rack is designed to minimize installation time and cost.

Rayport™ Frameless Module System

Our Rayport™ mounting solution, re-engineered to support frameless glass modules, holds two modules per set of rails.

T6 Ground Mount Rack

Designed for quick and easy installation, the T6 Ground Mount fits all major PV modules including thin film panels.

T6 Pitched Roof PV Rail System

Designed for quick and easy installation, the T6 Pitch Roof PV Rail System fits all major PV modules including thin film modules.

Applied Energy Technologies (AET) is a leading global provider of solar mounting solutions.

AET designs, engineers, and manufactures solar mounting solutions for any type of solar installation.

Every product is meticulously engineered with a focus on developing low-cost, high quality products that minimize assembly time.

Visit AETenergy.com to find out more about AET's solar mounting solutions.
